SUMMARY

A Full Stack Web Developer with a background in customer service and educated through the University of New Hampshire Coding Bootcamp. Through developed skills in HTML, CSS, JavaScript and Angular, I am able to create an intuitive user experience through responsive web designs. Known for being a great collaborator and being very passionate about solving problems to allow the best experience for the users, I am excited to leverage the skills gained through previous work experience and my journey to becoming a developer to create responsive and effective websites.

TECHNICAL SKILLS

- HTML/CSS	- JavaScript	- jQuery	- Node.js	- MySQL
- Sequelize	- MongoDB	- Express	- React	- Angular

PROJECTS

Foodsta | <https://github.com/mmnos/Foodsta> | <https://deliciousfoodsta.com/home> *Full Stack*

- This app allows users to search for nearby restaurants, cuisines, or meals
- Users can create accounts and post reviews about their meals
- Reviews are entirely crowd sourced and is based on specific meals rather than the restaurant itself
- **Tools used:** Angular, HTML5/SCSS, AWS S3, Auth0, Express, Sequelize, Node.js, Google Places API

Bay Calendars | <https://github.com/emcoraccio/Project2> | <https://secure-taiga-47401.herokuapp.com/> *Full Stack*

- This app allows users to create accounts and safely stores their information inside the database using user authentication
- Once logged in, users can view their calendars and can schedule and request events
- Users are allowed to invite each other. If an invite is accepted, it will populate on their calendar with event details
- **Tools used:** Materialize, jQuery, Node, Sequelize, Express, Passport, Handlebars, Moment

Moodify | <https://github.com/emcoraccio/Moodify> | <https://emcoraccio.github.io/Moodify/> *Front End*

- This app will suggest music based on the current weather, time of day and the mood set
- Responsibilities included gathering information from API's to display on the page and the overall design of the site
- **Tools used:** Materialize, jQuery, Moment.js, Spotify/OpenWeatherMap API

EMPLOYMENT

Target - Inbound Team Member - Bedford, NH (April 2019 - October 2019)

- Assisted team members when necessary with stocking new merchandise and organization
- Helped guests locate products and resolve other issues

MegaFoods - Packaging - Manchester, NH (January 2019 - April 2019)

- Ensured the correct product was being used for current task
- Confirmed current items met safety guidelines such as expiration dates and maintained cleanliness in the work space
- Assisted in the upkeep of the product inventory

EDUCATION

Coding Bootcamp Certificate: University of New Hampshire (June 2019 - December 2019)

- A 24-week intensive technical program focused on developing skills in HTML, CSS, Bootstrap, JavaScript, jQuery, Node.js, MySQL, MongoDB, Express and React
